

Student Placements

I would love to be apart of the stories, events and people that are connected because of space. Space is a place about acceptance and joining together. I haven't really been a part of anything like this before, so I think as a person I could gain from the experiences of the people that space helps out. - Phillip Portman, Griffith Student, Pre 2010 Placement

s.p.a.c.e is a learning community and we welcome students from schools, universities, and TAFE organisations with open arms. We ask that students who do engage in s.p.a.c.e as a learning experience be open to trying new things and willing to take on leadership throughout their time with us. In exchange, s.p.a.c.e supervisors are willing to go above and beyond the placement to allow students the most individual and relevant experience we can create. s.p.a.c.e is for and about its people and for the time that students are with us their growth and development is as important as any other stakeholder.
